PostgreSQL Consulting, Support and Remote DBA

PostgreSQL Performance Audit - What we do in PostgreSQL Performance Audit and Forensics / Diagnostics ?

- **Hardware and Operating System configuration review and recommendations** - Measure infrastructure throughput against PostgreSQL transaction and auditing Linux performance
- **Balancing between Vacuum and disk bloat** - Optimal capacity planning and sizing for storage efficiency / performance and Data Reliability
- **PostgreSQL parameters recommendations and tuning** - Recommending optimal PostgreSQL configuration parameters for performance
- PostgreSQL High Availability solution audit and recommendations
- PostgreSQL Disaster Recovery infrastructure audit and recommendations
- PostgreSQL application / SQL & index performance audit and recommendations
- PostgreSQL connection pooling audit and application specific connection handling recommendation
- PostgreSQL security audit - Auditing password management, policy / data access control operations and encryption settings / configurations
- Recommending optimal methods for bulk data loading

PostgreSQL Performance Audit	Rate (plus GST / Goods and Services Tax where relevant)
PostgreSQL Performance Audit, Diagnostics / Forensics and Recommendations	US $7,500 / PostgreSQL Instance

MinervaDB Enterprise-class Support (24*7) for PostgreSQL - How MinervaDB Enterprise Support works ?

- Recommendations for optimal PostgreSQL installation and configuration
- PostgreSQL optimal indexing recommendations for performance and scalability
- PostgreSQL capacity planning / sizing recommendations
- PostgreSQL high availability and database reliability engineering solutions recommendations
- PostgreSQL database security guidance and recommendations
- PostgreSQL DevOps, and automation recommendations
- PostgreSQL upgrades / migration recommendations
- PostgreSQL community bug fixing and patching recommendations
- **MinervaDB support channels - Email, Slack, Online Ticketing Systems and Phone**

Enterprise-class PostgreSQL Consultative Support (24*7)	Rate (plus GST / Goods and Services Tax where relevant)
Unlimited PostgreSQL Instance	US $25,000 / Year

MinervaDB Remote DBA Services for PostgreSQL - Customer PostgreSQL Database Infrastructure fully managed by MinervaDB Remote DBA Team 24*7

- **Observability and monitoring** - MinervaDB Remote DBA accountable for 24*7 monitoring of customer PostgreSQL Database Infrastructure Operations performance
- PostgreSQL installation and configuration
- PostgreSQL performance benchmarking and capacity planning / sizing
- PostgreSQL performance audit and tuning / optimization
- PostgreSQL backup and Database Reliability Engineering services
- Building PostgreSQL High Availability and failover solutions
- PostgreSQL Database Security Services
- PostgreSQL upgrades and migration
- On-call PostgreSQL DBA service available 24*7
- Dedicated Technical Account Manager for tracking service delivery and escalation

Remote DBA Plan	Rate (plus GST / Goods and Services Tax where relevant)
On-Demand Remote DBA (8 hours Remote DBA per month)	US $1,600 / month
Quarter DBA (40 hours of remote DBA services per month)	US $6,000 / month
Half DBA (80 hours of remote DBA services per month)	US $10,000 / month
Full DBA (160 hours of remote DBA services per month)	US $16,000 / month
The Ultimate DBA (Remote DBA services for 24*7*365)	US $54,000 / month

★ We monitor 24*7*365 your database infrastructure operations performance and reliability.
★ We don't bill you per instance, Our remote DBA plans are not dependent on the number of Database Instances we manage for you !

To know how we can help you in architecting and building an enterprise-class web-scale database infrastructure operations, please book for an appointment here or send email to contact@minervadb.com
